Analyze verticality data

Compile and analyze data collected from steerable drilling data, Koden™, SonicCaliper™ and other instrumentation to statistically estimate the most accurate shape of your excavation, and visualize it at any depth.

Project Experience Interactive Data Management and Analysis of Barrier Walls:

- Wolf Creek Information Management System (WCIMS), winner of 2013 USACE Innovation Award
- Center Hill Dam Secant Wall (WallTracker)
- Herbert Hoover Dike Cutter Soil Mixer Barrier Wall

Understand your wall

View pile elements in the context of other site data to analyze trends in production rates, slurry usage, and more.

Access your data

View elements in web, desktop, and mobile systems as soon as data are available. Interactively select layers and views, generate reports, and take command of production.
